## PROFILE

Experienced Software Engineer with a passion for learning and a hunger for new challenges. Equipped with a diverse and promising skill set for seamless integration in any team, as well as being able to effectively self-manage during individual or single-person projects. Proficient in an assortment of languages and frameworks including React Native, React, Spring Boot, NodeJS, and Typescript.

---

## PROFESSIONAL EXPERIENCE

Jul 2022 — May 2023

### Software Engineer, BairesDev LLC

Spanish town

Contracted to Levitate to provide development services to their mobile app.

- Enhanced the Levitate mobile app performance and user experience by resolving memory leaks, code errors and UI inconsistencies.
- Led the configuration of Microsoft Visual Studio AppCenter to improve the delivery of completed features to be tested.
- Implemented new features in collaboration with the design team to extend most features available on the web application to the mobile app including calendar updates and notifications.

Jun 2020 — Jul 2022

### Software Developer, Smart Mobile Solutions (Contracted to National Commercial Bank)

Kingston

Served as team lead for the investment app and contributed multiple feature development to the banking app, completed peer reviews, onboardings, review merge requests, scrum ceremonies and check server logs.

Front-end Development

- Develop user-engaging features including QuickSend targeting user retention rate to upwards of 77% and driving revenues to \$17.04 billion(JMD)
- Led the deployment of new feature releases and major bug fixes to the app stores (Apple and Google).
- Drive implementation of test cases to help maintain the code coverage to target 75% through merge request reviews and peer review sessions.

Back-end Development

- Design and develop scalable APIs to serve over 500,000 customers for both banking and investment apps.

May 2017 — May 2020

### Technical Support Specialist, Agile Business Solutions Limited

Kingston

- Provide support through telephone, remote or face-to-face sessions to help resolve clients' IT-related issues.
- Maintain Office 365 and Server 2012 Environments.
- Monitor networks using several monitoring tools such as SolarWinds.
- Configure and mount various network equipment and install relevant OS images and firmware upgrades.
- Design, develop and maintain CMS websites.

---

## EDUCATION

Sep 2013 — Apr 2017

### Bachelor of Science, Vocational Training Development Institute (VTDI)

Kingston

Bachelor's Degree in Information and Communication Technology (Second Class Honors)
